There are two major world events that happen to fall precisely on the Spring Equinox; it is either to mark an ‘end’ or a ‘beginning’ of a moment in time that could have prophetic significance of Biblical proportions. The Jewish Civil Year is superimposed below the modern time-line as are the Equinoxes with the day-spans between each type of Eclipse & between the Moon & Sun Eclipses to have a context & overall perspective of timing.

In the years 2014-2015, a phenomenon will occur during this time-frame in our modern history that could herald a ‘prophetic event’ in the ‘prophetic clock’ of God - The LORD GOD Creator of the Heavens & Earth (יהוה) GOD of Israel. In the Heavens, there will be a ‘witness’ -a unique consecutive 4 Total Lunar Eclipse sequence or TETRAD spanning 1.5 years. This event has not occurred since the end of World War 2 (1949/50) & the Arab-Israeli 6-Day War (1967/68). It is the 6th since Cvesius & will not repeat until well into the distant future. It is constant & continuing. What is significant is that each TETRAD period is marked precisely by the Jewish First & Last Feasts of GOD - Passover & Sukkot. During each TETRAD, it has been a time of great travail for the nation of Israel, a time marred by war, death & or life/rebirth, struggle. Jesus Christ stated that when His Return would be at hand, the Moon would turn Red as ‘blood’ & the Sun would turn Black as ‘sackcloth.’ These celestial markers would then be part of the significant signs to the forthcoming End of Days & related to Christ’s pending Final Judgment & the consummation of the end of this present Evil Age. The TETRAD sequence is perhaps yet but another of God’s signatures & time pieces. For Illustration Purposes Only. No Predictions Are Made.

The purpose of this study is to focus & amplify the 2014-2015 TETRAD time segment for a better understanding & to see its unique properties & patterns in light of Biblical Astronomy. The 4 TOTAL LUNAR BLOOD Moons are paired up - accompanied by their immediate & complementary Solar Eclipse. The March 20, 2015 Total Solar Eclipse in particular seems to accent & highlight the sequence & could signal a very significant time.

There are 3 Partial & 1 Total Lunar Eclipses that accompany the 4 Blood TETRADS exactly by a difference of 15 days; symmetrically mirrored to each other by 177 & 148 days for the Solars, 177 & 179 for the Lunars – the 1st 2 Solars are after Blood Moons, the last 2 are before. The Blood Moons occur near the Spring & Autumnal Equinoxes & the half way mark in terms of ‘time’ for the TETRAD sequence is on Dec Jan 2014-2015. The last Solar Eclipse which is a Partial occurs exactly on Rosh HaShana, September 13, 2015 & then 15 days later is Sukkot.

### Observations

- **Vernal (Spring) Equinox**
  - **March 20, 2015**
  - Jewish Religious New Year
  - 1260 DAYS = 3.5 YEARS
  - *Using 360 Day Years*

- **Will the TETRAD denote a major War?**
  - Psalm 63 & (WW3) or the start of the Tribulation / 3rd Temple?

- **LEGEN**
  - **Total Blood Moon**
  - **Total Solar Eclipse**
  - **Annular Eclipse**
  - **Partial Solar Eclipse**
  - **Equinoxes**
  - **Jewish Feast**
